BIO, NACHHALTIG, REGIONAL UND FAIR

AUGUSTE

MENU (ENGLISH)
“Premium” means to us: Organic, regional, fair and environmentally sustainable

ORGANIC
We carefully choose our food and drink providers and use organic foods only. For us it’s very important to strictly use meat from animals kept in species-appropriate environment. We know all our providing farmers personally and they are all “EU-organic“-certified.

REGIONAL
Most burger ingredients, like buns, meat and vegetables are regionally from Nuremberg and its surroundings (except vegetables in winter). That saves the environment and makes our region economically stronger. We know all of our important food and drink providers personally.

ENVIRONMENTALLY SUSTAINABLE
Our „upcycling concept“ is transferred into the restaurant design where we used old useless things to create furniture and decoration to save resources.

FAIR

Fair to costumers:
Even though organic & fair burgers are far more expensive than conventional burgers, our prices are low-profit calculated. We try to cook as healthy as possible. For instance we use sunflower oil for frying.

Fair to employees:
We offer working contracts without time limit and over minimum wage. To give young people a chance we also offer apprenticeships.

Fair to providers:
We are mostly provided directly from producers. Our farmers determine the prices they need for a living.

Fair to animals and nature:
Cattle and pigs used for our meat are all raised on Franconian organic-certified grassland farms.

Fair economies
We are preparing for charitable status. We are working since 2009 under the rules of the premium business operating system (premium os), which prescribes:

+ Ecological and regional targets,
+ Specific training of employees,
+ Fair pay over minimum wage, employees decide how they want to be employed
+ No profit: Our prices are calculated that all parties are paid fairly. Our CEOs get the same hourly rate as the employees.
+ Social, economic and environmental sustainability is not voluntary but is a firm rule of the premium-os

BIO-Kontrollstelle: DE-ÖKO-006
BURGER (MEAT)

We receive our burger meat from Franconian grassland farms only and it’s organic-certified.

Why Tea People?

Tea People was founded by Neeraj and Vishaka, a husband wife duo along with their Scottish friend Gillian. As the duo attributed their own success to the education they had received and firmly believed in the role of education in providing equal opportunities and in alleviating poverty, they decided to help. They teamed up with Gillian who at that time was running her own charity. The three of them together raised the required funds and provided the much needed assistance.

While all of this was great fun and was extremely satisfying, there was something that kept bothering the three of us. First, we realized that the scale of the problem was much bigger and way beyond that one school. Second that fundraising alone was not a very sustainable way of addressing the issue. Being dreamers, all of us, we had very special “pyjama party” - meetings where we discussed our world changing ideas! Our light bulb moment came during one such pyjama party where the aroma of our Darjeeling inspired us to form a social enterprise that would use tea as the medium for bringing about a positive social change. The idea was to bring the taste of a wide variety of fine, specialty and flavoured tea to the tea lovers of the world and give them a chance to change the lives of the poor children and empower communities living in and around the tea growing areas. This is how Tea People was born! We are hence set up as a social enterprise and have committed to put aside at least 50% of our net profits towards our social causes.

3,20 €  tea people – “every day”
A robust blend of finest Indian, Sri Lankan and Kenyan teas

FAQ

Why are Auguste French fries so small/short?

We obtain potatoes from Franconia (Schwabach) only. The farm is “Bioland” certified. Means, these potatoes are only natural fertilized and do not get in touch with any chemical insecticide. That way, it may happen, depending on weather and a lot of other influences, that the potatoes are growing smaller than average. Our potato farmers don’t use artificial irrigation, as it is usual in other regions around Nuremberg. We don’t think it is environmentally sustainable to import water from the south (Altmühl), where it already gets narrow.

All of these facts results in potatoes smaller than the average glass house products. Franconian potato sorts, which are high in starch and therefor good for French frying are also not really long and large by nature. Unluckily, not all types of potato are good to be used as French fries. That’s why here in Franconia we better get used to the fact, that our French fries might be smaller and shorter than somewhere else, but still taste yummie. We guarantee for maximum environmentally sustainability, health, fairness and the typical original taste of “Franconian French Fries”.

Why are my French Fries not as crispy as last time?

Our French Fries are crispy almost all throughout the year. But for a few months of the year we have to use a different potato variety, which is not as high in starch and therefor gets not as crispy and crunchy as usual. But it has the same typical delicious potato taste as our regular sort. Our trusted potato farmers are guaranteed, that all throughout the year we pay the same prize and obtain the same amount of potatoes. We think that is just fair and sustainable and that is part of our Premium-Operating-System.

Why does my Burger Meat taste flavorless?

Sometimes we need to retrain our taste buds, especially if it comes to natural and healthy food. Our patties are produced by a trusted butcher, who uses our own recipes. Our recipe contains beef and a little bit of salt only. Most of the common beef producers use a lot of spices and flavor enhancers in their patties, they also use way more salt than we do. We want to offer a high quality, all natural and healthy product. You can always add more salt if you like so. Our burger sauces are not very dominating and not too spicy and salty either, so you can taste the natural beef flavor. It’s really a treat to taste the meat of real franconian grass-fed cows, which were able to live a long stress-free life in species appropriate environment.

Why the burgers are so expensive?

We work with the Premium-Operating-System, which doesn’t allow us to operate profit-oriented. Our products are well calculated, so that

1. We minimize the harm on our environment;
2. We can be fair to our farmers and providers and pay the prize they need for a living;
3. We can offer fair payment for our employees;
4. We do our very best to produce healthy products ( for instance high quality oil for cooking);
5. We compensate CO2 via Atmosfair;
6. We guarantee maximum possible animal welfare;
7. We try to use exclusively regional food for our products;
8. Our Restaurant is “BIO” and “Bioland” certified and uses appropriate goods from such sources only;
